Nitin Ashok Bane

Electronics & Telecommunication Engineer | Embedded Systems | Web Development

banenitin02@gmail.com | +91 9579390586 | Pune, India

LinkedIn

Summary

Final-year B.E. Electronics and Telecommunication student with a Diploma in ENTC and hands-on experience building sensor-based embedded systems, from fire detection and suppression to portable soil analysis. Completed an internship at E Spark Tech developing an alcohol detection system. Also works with HTML, CSS, JavaScript, and MySQL for web development. Looking for an entry-level role in embedded systems, electronics, or software development.

Education

Trinity College of Engineering and Research, Pune 2024 – 2027 (Expected)

B.E. in Electronics and Telecommunication (Final Year)

JSPM's Rajarshi Shahu College of Engineering (Polytechnic), Tathawade, Pune 2021 – 2024

Diploma in Electronics and Telecommunication

Skills

Web Development: HTML5, CSS3, JavaScript

Databases: MySQL

Electronics: Embedded Systems, Microcontrollers, Sensor Interfacing, Circuit Design & Testing

Spoken Languages: English, Hindi, Marathi

Internship

E Spark Tech Dec 2025 – Jan 2026

Embedded Systems Intern

- Developed an alcohol detector that senses alcohol in a person's breath using a gas sensor and triggers an alert when the level crosses a safe threshold.
- Assembled the circuit, calibrated the sensor, and tested the prototype to get reliable readings across repeated trials.
- Worked through the full build cycle, from requirement analysis and component selection to prototyping and documentation.

Projects

- **Portable Soil Analyzer** (B.E. Final Year) — Developing a handheld device that measures key soil parameters such as moisture, pH, and temperature on the spot, helping farmers plan irrigation and fertilizer use without lab testing.
- **Fire Alert and Extinguisher System** (B.E. Third Year) — Built a system that detects fire using flame and smoke sensors, raises an immediate alarm, and automatically activates an extinguishing mechanism to contain the fire early.
- **Microwave and Radar System** (Diploma Final Year) — Built a radar system that scans its surroundings to detect nearby objects and display their distance and direction, applying microwave and radar communication principles.
